

CASE STUDY

FIRE DAMAGE DEAL, KENT

Client: Insurance company

Client sector: Residential

Project value: circa £200k

Project scope: Rebuild

Services Provided: Full house
rebuild following extensive fire
damage

Project timeframe: 16 weeks

PROJECT SUMMARY

Introduction:

This family home in Kent suffered extensive damage as a result of fire. Fortunately nobody was hurt in the blaze but the house was left without a roof, severe smoke damage, no electricity or water, structural damage and in need of complete rebuild and refurbishment.

We were instructed by the insurance company to rebuild the entire house. This included all plumbing and electrical work as well as decoration, carpets, kitchen and bathroom.

The Challenges:

Due to the fire damage, the first challenge was to safely clear the site of the enormous amount of debris so that work could commence.

Another challenge was the short timeframe of just 16 weeks to complete the project to ensure the family were in temporary accommodation for the shortest time possible.

The End Result:

Work was completed to our usual high standard and the house was ready to move into within the 16 week timeframe we had originally calculated.

A neutral colour palette of white and grey was agreed and implemented throughout the design of the house.

The family have now settled back into their home and we wish them many years of happiness there.
