**Project value:** sub £1m

**Project scope:** Office refurbishment

**Services Provided:** Design, project  
management & construction services

**Project timeframe:** 6 months

**DELIVERED: ON TIME  
& ON BUDGET**

# PROJECT SUMMARY

## Introduction:

In 2018 Logic CP was awarded the refurbishment of the fundraising and finance offices for Princess Alice Hospice in Surrey,

We also carried out the expansion of existing and refurbishment of their meeting and conference areas.

We worked closely with interior designer Paul Beardmore of Edit Design Consultancy Ltd. who was involved in the construction works as well as the FF&E. This ensured a very specific finish for our mutual client.

## The Challenges:

The 2-storey office building, required modernisation throughout. The upper floor working areas had been squeezed into the small loft space and needed expansion.

Due to the sloping ceilings and restricted height, this area felt claustrophobic and was not entirely fit for purpose.

Logic CP worked closely with our appointed structural engineer to overcome this challenge. Our design replaced the internal load bearing walls with structural steel supports to create a more open and accessible workspace.

## The End Result:

Princess Alice Hospice now has a modern and efficient fundraising & finance office with state of the art conference rooms.

There is more usable workspace, additional storage in the eaves, a contemporary feel and more light.

Even the kitchen areas, toilets, staircase and corridors have been modernised.

The client was delighted with the high level of finish as well as the professional service from the outset to completion.

**"Every element of this project came together to create a really fantastic workspace for the fundraising team at Princess Alice Hospice"**

**Joe Hearne, Design Manager - Logic CP Ltd.**
