

MEOPHAM SPORTS PAVILION

Client

Meopham Parish Council

Services

Project Manager & Employer's Agent

Location

Meopham, Kent

Acting as Project Manager and Employer's Agent, Logic PM assisted the client in the strategic brief of the refurbishment to Meopham Sports Pavilion. The project comprised the erection of an extension of a meeting room/open plan community area and upgrade of the current changing rooms facilities used by the village football team. To improve the overall facilities, the existing car park was extended to create further capacity at this popular space.

Logic PM effectively managed the process of the design and the various designers on the project, enabling the client to meet the legal obligations of the local Parish and the Football Foundation. As Principal Designers Logic PM created the pre-construction commencement information pack and ensured the successful contractor worked to this document complying with the CDM Regulations 2015. Logic PM also managed the tender process, contractor selection and appointment, acting as the primary contact for the project. We oversaw all the construction works ensuring building compliance and quality monitoring, from commencement on site to the close out, snagging and successful handover.

Our services on this project meant the Client had a responsible person assigned to their project at all times, ensuring the deadlines and budgets were carefully managed and allowing the team to progress on site. Our open communication structure gave the client direct access to an assigned project manager and business principal throughout.
